American Water Works Association (AWWA)

Brief History

American Water Works Association (AWWA) is an international non-profit, scientific and educational association founded to improve water quality and supply. AWWA establishes in 1881. In reviewing the success of the Safe Drinking Water Act after 1974, senior EPA officials cite the vital role that AWWA played as kind of a non-threatening

meeting ground, particularly at the local level. . In 1908, AWWA began developing industry standards for products, processes and best practices. The AWWA Standards Program is recognized internationally as a source for scientific and management reference resources for the water community.

Scope and Coverage

AWWA has a membership (as of 2012) of around 50,000 members worldwide. AWWA members include: water utilities, treatment plant operators and managers, scientists, environmentalists, manufacturers, academics, regulators, and others with an interest in water supply and public health. AWWA works through advocacy, communications, conferences, education and training, science and technology, and local action among 43 AWWA Sections throughout North America. Currently, there are over 150 AWWA Standards covering filtration materials, treatment chemicals, disinfection practices, meters, valves, utility management practices, storage tanks, pumps, and ductile iron, steel, concrete, asbestos-cement, and plastic pipe and fittings.

Kind of Information

The website provides excel file which provides list of standards. List gives information like standard's name, title, year of publishment, key words related to the standard, committee, product number, member price and nonmember price. New and revised standards are also highlighted in the webpage and by entering that standards one can found information like the full title, publisher name, catalogue numbers, media type, number of pages, and coverage of the standard. The entry also provides list of another related standards.

Special Features

- To broaden distribution of information on water and related subjects, AWWA publishes the periodicals *Journal AWWA* and *Opflow*.
- AWWA also publishes a variety of books, training manuals, standards, reports and videos for use by water professionals and others.
- The Association also hosts an annual conference and exposition for the entire organization each summer in North America.
- Through the Partnership for Safe Water AWWA also works with the United States Environmental Protection Agency and other water organizations to help water providers optimize system performance beyond existing regulatory levels.
- AWWA presents a number of awards every year to individuals who provide notable service to the drinking water community. Among the major awards given are the Abel Wolman Award of Excellence and the George Warren Fuller Award.

Arrangement Pattern

In the excel sheet, the standards are listed according to the titles of the standards. The standards are arranged alphanumerically.

Remarks

For more than 100 years AWWA has developed voluntary standards of minimum requirements, materials, equipment and practices used in water treatment supply. They are used by thousands of manufacturers, distributors and facilities worldwide to ensure the highest quality products and service.
