Brief History

In the year 2015 the first volume of the yearbook took shape. With the aim of uncovering paths to aid the understanding of the common and

the specific roots of European scientific thought and its building connections with non-European traditions.

Scope and Coverage

This is a peer-reviewed international yearbook dedicated to the history of Psychology and especially to the interconnections between historiographic survey and problems of Epistemology. As cultural studies are interdisciplinary in nature, the yearbook encompasses all the common areas of psychological research and its associated disciplines like Philosophy, Sociology, Anthropology, Psychiatry, Physics, Physiology, Neurology, Biology, Zoology etc. Apart from original essays, the yearbook publishes unpublished and archival materials, discussions, interviews, book reviews and reading recommendations.

Kind of Information

The first edition of the yearbook *European Yearbook of the History of Psychology: Sources, Theories and Models 2015* has original essays, short papers, interviews, book reviews and obituary as its main items.

Some of the erudite works found under the heading “Original Essays” are the following:

“The Status of the History of Psychology Course in British and Irish Psychology Departments” by Adrian C. Brock & Matthew Harvey (Independent Scholars, United Kingdom),

“Aristotle’s Theory of Self-Perception” by Marcello Zanatta (University of Calabria, Italy) etc.

Within the “Short paper” segment the article, “In Search of Animal Intelligence: The Case of the Italian Psychologist Tito Vignoli (1824-1914)” by Elena Canadelli, explores investigation of Italian anthropologist and comparative psychologist Tito Vignoli (1824-1914) into the hidden inner world of the animal psyche. Vignoli’s investigation was significant in the fact that he was one of the first Italian scientist to adopt Darwinian theory of evolution and applied simple experiments and observations in his probe of animal intelligence.

The highlights of this yearbook are its special attention to the common areas between psychological research and its nearby disciplines, absence of bias while each national research tradition is analysed and respected. A review section is contained in the yearbook.

Special Features

- ❖ Link to General news and of Congresses and Events.

Remarks

The yearbook is devoted to the subject of Psychology, specially to the interconnections between historiographic survey and problems of epistemology. Made primarily for the historians and philosophers of Psychology, Epistemologists, historians of Philosophy and Human Sciences, this yearbook is a commendable and useful work of scholarly writings.
